Preferences for deprescribing antihypertensive medicines in people living with dementia study:

Dear (organisation) member,

You are invited to participate in a survey which aims to understand stakeholder clinician preferences for potential benefits and harms of deprescribing antihypertensives for people living with dementia, to estimate the relative importance of different consequences in clinical decision making.

You have been invited as you are a member of ___________ (organisation) and we believe your experience and opinions on deprescribing would give us a valuable insight into clinician preferences for deprescribing options for people living with dementia.

The survey will take approximately 20-30 minutes to complete. Your individual response will be confidential. Your identity as a participant will remain anonymous.

If you have any concerns or complaints about the ethical conduct of the research project, you may contact the Ethics Administration Manager, University of Sydney +61 2 8627 8176 human.ethics@sydney.edu.au (Study number 2021/804).

If you would like to continue to participate in the study, please use the survey link below to enter and complete the survey online. Please note that completion and submission of this survey means that you consent to participate in this study.
