

Season's Greetings!

Dear colleagues, dear friends,
As 2024 comes to a close, I would like to take a moment to express my heartfelt thanks to each of you for your remarkable contributions to the EuGMS community. This year, once again, we have demonstrated the power of collaboration, and it has been a true pleasure to witness the vibrant and communicative spirit that defines us.

Together, we stand strong, we stand out, and we continue to make a meaningful impact. The 2024 congress in Valencia was a truly inspiring success, with an abundance of impressive academic achievements shared. I am deeply grateful for your individual contributions, both during the congress and throughout the year. Your dedication has played a vital role in the success of the SIGs, ECGI, and GEI and all EuGMS projects, helping to make its educational and scientific initiatives both enriching and inspiring.

Looking ahead to 2025, I am excited about all the opportunities that await us—educational, scientific, and in the realm of dissemination. With the 2025 congress in Reykjavik on the horizon, we can look forward to another milestone year, one that promises to be the highlight of our efforts.

Wishing you all a collaborative, inspiring, and fulfilling 2025!

Warmly,
Prof. Nathalie van der Velde
EuGMS Academic Director

All the best for 2025!
