

Position of MD attendee of geriatric area with dedication to practice and research in Barcelona.

Parc Sanitari Pere Virgili is looking for a physician with a research trajectory.

Parc Sanitari Pere Virgili is a public institution in the center of Barcelona, with monographic dedication to geriatrics and palliative care (mainly geriatric rehabilitation, subacute care, palliative and dementia care), including 360 beds plus different outpatients and home care services. It is a reference institution in Catalonia and Spain, in its type, with a strong projection towards integrated care and community-based care, and innovative projects in the areas of frailty, cognitive impairment, geriatric rehabilitation, care transitions and geriatric hospital at home, among others. The institution, which also includes a separate division of primary care, is closely related with the two main general university hospital in Catalonia, such as Vall d'Hebrón and Clinic hospitals, and with primary care of an area of approximately 1 million inhabitants.

The Research group on Aging, Frailty and care Transitions in Barcelona (RE-FIT Bcn) of Parc Sanitari Pere Virgili is officially accredited and is part of a leading medical research institution in Spain, Vall d'Hebrón Institute of Research (VHIR). Although with a short trajectory, in the last 2 years the group was funded by 3 competitive public research calls and it received different awards. Thanks to an agreement with the Universitat Autònoma de Barcelona, it can host and direct PhD candidates. This position, with shared dedication to clinical practice and research, is clearly directed to reinforce and move forward the research project of the institution.

Requirements

- Title of MD (homologated in Spain or in process), and specialization. A title of specialist in geriatrics, family or internal medicine, or even specific medical specialties will be particularly valued.
- Languages: Spanish and/or Catalan, and English.
- A curriculum and trajectory in research, including PhD, post-doctoral periods or contracts, international publications and research funding, in particular in the areas of aging epidemiology and clinical research, will be valued.
- We also require previous clinical experience.

Conditions

- Depending on the candidate's profile, we will value the option of facilitating the conditions of starting and developing a research line, and a career projection in the academic field.
- In case of non-Spanish but EU candidates, we offer support for the homologation of the titles.
- Place: Barcelona (Spain).
- Start: end of 2018 (approximately).
- Working hours: 1688 hours/year, approximately from 8 am to 4 pm, plus afternoon-night shifts (an average of 3/month).
- Salary according to the local legal reference framework (SISCAT).

Candidates' selection

Please send an updated CV with a recent Picture to seleccio@perevirgili.cat indicating, in the object of the email: **METGE/SSA or PHYSICIAN**.
